

## HB2783 Proponent Written Only Testimony

Chairman Carpenter and members of the committee,

I support this bill as it upholds principles of individual freedom and limited government intervention. State agencies, cities, or counties should not be allowed to impose regulations on the energy source used in motor vehicles. This legislation ensures that citizens have the freedom to make personal choices regarding their vehicles without unnecessary restrictions.

In addition, allowing state agencies and municipalities to set their own vehicle purchase policies promotes decentralization and local control. This bill promotes individual autonomy while reducing unnecessary government interference.

I encourage the committee to pass this bill favorably out of committee.

Respectfully,

Kari Sue
