Senate Education Committee

March 18, 2024

Good afternoon, Madam Chair and members of the committee.

KASB appears today in support of HB 2494.

KASB's member-approved legislative policies support efforts to keep our students, staff, and patrons safe and healthy.

We appreciate and applaud the work of Chair Thomas, the members of the House Education Committee, the American Heart Association, the State Board of Education, USA-Kansas, KSHSAA, and KNEA to develop a bill that will allow school districts to implement life-saving measures through the use of AEDs and Cardiac Emergency Response Plans.

Thank you.
