Senate Fed and State Committee

Hb 2783

Proponent

WebEx

Chairman and Committee Members,

I am Debbie Detmer and a proponent on Hb 2783.

We Can't let the federal governments money and agenda push our car dealers into bankruptcy or allow city, county or state agencies restrict use of gas burning vehicles to push EV vehicles onto the public . Let the individual person decide what energy source in a vehicle best suits their needs and economic situation. This global overreach to demand electric sources only has to stop.

Please pass out Hb 2783 favorably.

Thank you

Debbie Detmer
