

2012 Kansas Statutes

19-3509. Management, control, maintenance and enlargement of system; supply water for other water utilities and political subdivisions; insurance for employees; property. The water district board shall establish, manage, purchase, construct, operate, maintain and have the exclusive control of the water supply and distribution facilities and establish rules necessary for the safe, economical, efficient establishment, operation, maintenance and management of such water supply and distribution system. The board shall produce and supply water for domestic, industrial and municipal use to the inhabitants of the district and to other water utilities and political subdivisions of the state as provided by K.S.A. 19-3515, and amendments thereto. The board may improve, extend or enlarge the water supply and distribution system for such purposes. The board may authorize the payment of cost of group hospitalization, medical and surgical insurance benefits for its employees and officers and it may take by condemnation and acquire by purchase, gift, devise, or bequest such franchises and real or personal property either within or without the district as may be needed or convenient.
