

65-1,183. Waste management system; standards for operators; failure or unplanned release. The secretary shall adopt rules and regulations establishing:

(a) Standards for training and certifying, and for periodic continuing education or recertification of, swine facility operators maintaining or supervising the swine waste management system of a swine facility that is required to have a permit; and

(b) procedures for notifying the department of failure of a swine waste retention lagoon or pond or any unplanned release of animal waste by a swine facility.

History: L. 1998, ch. 143, § 7; May 7.
