

Kansas Agricultural Aviation Association

HB2619 Proponent – House Agriculture Committee

February 12, 2018

Chairman Hoffman and Committee-

The Kansas Agricultural Aviation Association is in support of HB2619. Electronic records and communication are well-established across our industry and permitting their use for invoicing customers and for keeping necessary documentation required by the KDA and others is a logical step.

The mobile and geographically wide-ranging nature of the work of aerial applicators has made the use of mobile devices a key part of the timely, accurate, and efficient delivery of the services Kansas farmers and ranchers require. To have the compliance and record-keeping aspects of their operation under the same umbrella of technology will be very helpful.

We applaud the KDA for moving forward in this area and concur with the Kansas Pest Control Association in supporting HB2619.

Steve Hitchcock – Government Affairs
