---

Chairman Jennings,

According to our dispatch center as far as swatting calls, we don't specifically keep any stats on those. JCSO units have responded to two (2) calls specifically created as "Bomb Threat" within the last year and at least one or two at county buildings that were created as "Suspicious Activity". Unfortunately, CAD has no way to provide statistics on the number of falsely reported calls. It is not one of the categories used by CAD software that can be individually tracked. The "Suspicious Activity" category is the closest description available.

A software upgrade is not planned at this time due to cost.

Greg Smith  
Special Deputy for Governmental Affairs  
Johnson County Sheriff's Office
