Re: HB 2601

Education Committee Members,

Thank you for taking time to hear our concerns and issues we have with the current situation regarding vaccines in Kansas.

As a Kansas resident and mom to small children I absolutely do not support any mandates of vaccines or any medical procedure. I personally have 3 sisters that have vaccine injurys. Seeing that my family is prone to vaccine I feel that my husband and I should have the right to choose whether my kids get vaccines.

With the lack of accountability the vaccine manufacturers are privileged to, have I dont believe it's right to mandate shots. An industry with very little repercussions for it's harmful actions cant be trusted.

Where there is risk there HAS to be choice. America was built in freedom, help us keep our freedom!
