Re: HB 2601

Dear Education Committee Members,

I am a Kansan, and I support medical freedom and vaccine exemptions. I believe this decision should be a personal choice left up to the individual or parent. No medical procedure should be mandatory. Taking away health freedom is a direct violation of our rights. I speak for parents of vaccine injured children, I speak for vaccine injured children and adults. I speak for parents of children that would be vaccine injured if they were vaccinated. I speak for the preborn babies that are being used in the production of vaccines. I speak for anyone that is opposed to vaccines for moral or religious reasons. Do not take away our rights as Americans.
