Re: HB 2601

Dear Education Committee Members,

As an American who has had close family members fight and die to protect our freedoms. I am writing to ask you to support Representative Huebert's bill HB 2601. I am against any vaccine mandates and against letting a flawed agency like the KDHE have any say in my health and the health of my family. Mandating vaccines violates the religious freedoms that I am guaranteed in the United States of America. A freedom that generation after generation in my family has gone to war to fight and project. I urge you to protect our freedoms as well.

Sincerely,

Meredith Dodd
Manhattan, KS
