

- The State of Kansas needs to regulate the Big Wind Industry...Not the Counties
- 600 foot turbines are now being erected in Kansas too close to neighbor's property and homes
 - Jeopardizing public health, safety and welfare
 - Decreasing property values
- Flashing red lights at night are a NUISANCE
 - On demand aviation lighting is the solution to annoying lights
 - Make on demand lighting a REQUIREMENT
- **Approve HB. 2273!**
