

Gene Albers
Opposition testimony
HB 2273

Dear Chairman Seiwert and Committee members,

I am a recently retired farmer from Kingman county, NextEra put 2 towers on my property. The income from those 2 towers is what allowed us to make sure that we had the funds to retire. I really think the 1 and 1/2 mile setback is too much. I started farming in 1972 and sold my first bushel of wheat for 5.03. Today the price is 4.67 per bushel. A little income from a wind tower would sure help some farmers in Reno county like it did me. Don't let some city people decide what is good for the country people. Thank you.
