**House Committee on Federal / State Affairs
Chairman, Committee members,**

Thank you all for your time. I am submitting testimony both for my business and for my customers. I own a CBD company, we promote natural healing and Kratom plays a HUGE roll in helping people treat their opioid addiction. Because of the alkaline content of Kratom it interacts with the opioid receptor, essentially making it feel full. This allows people who are addicted to Pharmaceuticals a natural way to get away from them. I have customers who come in on a regular basis who are trying to get off of Percocet, Lortab or OxyContin. Kratom allows them to do this naturally. NO chemicals, nothing, ground up plant matter, a coffee bean cousin. Many of my customers are very grateful for the progress they have made in their lives. Seeing it has been awesome as well, so please support Kratom and nature.

Thank You
