**House Federal and State Affairs  
Chairman, Members of the committee,**

Thank you for being willing to read my testimony. Kratom is a natural plant that requires nothing but grinding and eating. No chemical process. God made. This God-given plant allows me to treat pain without pharmaceuticals. Kratom is a coffee plant cousin which should say it all, I mean who doesn't like coffee, right? Kratom isn't an opiate or any kind of drug, it's interesting because it is so acidic, its alkaline content is so high that when ingested by humans it causes a reaction with the opiate receptors essentially blocking them, therefore numbing pain naturally without man-made drugs. I would appreciate the least amount of regulation and tax as humanly possible, please.

**Thank You**
