Oral Testimony before the

House K-12 Budget Committee

On

HB 2526

By

Dustin Avey, Managing Director Piper Sandler & Co. February 12, 2020

Background Information

We are not opposed to the intent of the current law which in 2015 established a method to manage the State's budgetary expense related to capital improvement state aid for bonds issued to fund facility improvements. Based on the last 5 years of data, there is an unintended inequity in the current law that should be addressed.

Capital Improvement Fund was established by the State of Kansas to assist school districts with making principal and interest payments on bonds. The purpose of Capital Improvement State Aid is to provide an equitable solution for funding capital improvement projects.

School Districts receive State Aid for Bonds based on their Assessed Valuation Per Pupil (AVPP). The State uses AVPP to evaluate district wealth. Based on wealth, state aid for each district is determined each year.

There are currently two Capital Improvement State Aid formulas:

- Bond Elections Approved by voters Prior to July 1, 2015
 - State annually calculates AVPP for each school district and state median AVPP
 - Median AVPP results in 25% State Aid. School Districts are assigned a State Aid percentage factor based on how they compare to the median. For every 1,000 more in AVPP than the median, the State Aid percentage decreases by 1% and for every 1,000 less in AVPP than the median, the State Aid percentage increases by 1%.
 - The percentage factor represents the portion of principal and interest payments the State will pay for each school district eligible to receive State Aid in the current fiscal year.
 - o For 2015/16, 200 school districts were eligible to receive State Aid under this law.
 - o For 2019/20, 189 school districts are eligible to receive State Aid under this law.
- Bond Elections Approved by voters After July 1, 2016 and July 1, 2017
 - o State annually calculates AVPP for each school district
 - The intent of this law is to establish a method to manage the budgetary expense related to State Aid for bond issues.

- Lowest AVPP District is capped at a state aid percentage factor of 75%.
- Fort Leavenworth (USD 207) is the lowest AVPP District in the State. Under the law for bonds approved by voters prior to July 1, 2015, the District would be receiving 106% State Aid. USD 207 does not have the legal authority to issue bonds.
- USD 207 continues to get 'poorer' on a per pupil basis compared to other districts due to limited assessed valuation (only a few parcels within the district are located outside of the base).
- Based on the law for bonds approved after July 1, 2015, Fort Leavenworth is capped at 75%
- As a result, State Aid for all other districts is decreased by the same percentage point drop. For example, if a school district was receiving 50% State Aid on bonds authorized by voters prior to July 1, 2015 that district would be now be receiving 19% on bonds authorized by voters after July 1, 2015 (subject to annual adjustments).
- For 2015/16, 159 school districts were eligible to receive State Aid under this law (See Exhibit A).
- For 2019/20, 127 school districts are eligible to receive State Aid under this law (See Exhibit A).
- Based on current trends, it is likely, that within 4-5 years, less than 100 school districts would be eligible to receive State Aid under this law (See Exhibit B).
- Districts who have issued bonds under this law will continue to see a decline in State Aid.

State Aid Solution

The result of the current law for bonds authorized by voters after July 1, 2015 has unintentionally created inequity for Capital Improvement State Aid.

The current law for bonds authorized by voters after July 1, 2015, if managed correctly, provides a method to manage the State's budgetary expense related to this program.

The lowest AVPP district in the State is Fort Leavenworth. Statue KSA 72-1210 relates to the organization of USD 207 and it states that 'The Board of Education of the school district shall not have the power to issue bonds'.

School Districts receive State Aid for Bonds based on their Assessed Valuation Per Pupil (AVPP). The 'per pupil' portion of this calculation includes virtual students.

Suggested Legislative Review and Consideration

Modify the current law to require that school districts must have the authority to issue bonds in order to be eligible to receive Capital Improvement State Aid (Removes Fort Leavenworth USD 207) from the calculation. In addition, modify the formula to exclude virtual students from the per pupil count. These modifications appropriately realign the law with its original intent which is to manage long term budgetary expense and provide an equitable method for funding capital improvements while focusing on local property tax relief.

Number of Districts Eligible for State Aid					
_	2015/16	2016/17	2017/18	2018/19	2019/20
Before 2015 After 2015	200 159	196 153	197 144	189 141	189 127

Districts eligible for State Aid before 7/1/2015, but not eligible for State Aid currently

USD #	County	District Name
102	Gray	Cimmaron-Ensign
105	Rawlins	Rawlins County
107	Jewell	Rock Hills
108	Washington	Washington Co. Schools
109	Republic	Republic County
