Committee Assistant

RE: Proponent of HB 2513

Ms Broxterman,

I would like to record my stance in support of HB 2513. The physiological tyranny that the Kansas State Department of Education has imposed over the years on our children and educators that is called Social Emotional Learning (SEL) must come to an end. This bill does provide some protection for parents and families to be informed about what data their local schools are collecting about their students and how they intend to use and store that data.

This bill should provide some basic protections of the rights of parents and students to data and information privacy previously unsecured by overreaching education administrations.
