House Transportation Committee

RE: Overpass Naming

Representative Proehl and Committee Members,

This letter is to formally request the newly constructed Fourth Street bridge in Pittsburg after my father, Dennis Crain.

Our family history of owning American Concrete Company, Inc., spans fifty-one years, and I am the third generation. My grandfather, William Noble, purchased the company in 1971. Shortly after my mother graduated high school, she went to work for my grandfather. My father joined the company in 1974 after my parents were married. Upon my grandfather retiring in 1989, my parents assumed ownership of the company. When my dad passed away in 2020, I assumed the role of company President.

I am requesting the bridge, located just south of our plant, be named the DENNIS CRAIN bridge. My father's involvement in various community organizations, as well as his dedication of providing quality ready-mix concrete to our customers and employing countless employees over the years is the reason for my request. Together, he and my mother worked hard running a successful business, never expecting any recognition for their contributions.

Should you have any questions, please let me know.

Very best regards,

Justin N. Crain, President / CEO  
American Concrete Company, Inc.
