

Madam Chair and Members of the Committee,

We appreciate the opportunity to provide testimony on special education funding and will focus our remarks on three topics:

1. Some funding isn't counted in the excess cost formula.
2. The increase in cash reserves for SPED and other operating funds refutes the notion that funding is insufficient.
3. An audit is needed to identify costs that are inappropriately allocated to special education.

Some funding isn't counted in the excess cost formula

According to KSDE Deputy Commissioner Craig Neuenswander, special education students are eligible for weightings, but the formula in statute for calculating excess costs does not take that into account.ⁱ K.S.A 74-3422(a)(2) deducts weightings, which produces a lower amount of regular aid for special education students.

The adjacent table compares total aid provided for SPED students to total SPED spending. State aid for Special Education in both years is from the FY 2023 July Comparison Report. Regular aid for SPED students is calculated from the KSDE FY 2022 Legal Max report. Local Option Budget aid applies the applicable statewide LOB percentage to the combined total of SPED aid and regular aid for SPED students. All other aid categories are as presented at a November 1, 2021 meeting of this committee.

Funding Provided for Special Education		
Description	FY 2021	FY 2022
SPED aid ¹	\$ 505,416,000	\$ 513,030,935
Regular aid for SPED students ²	193,133,008	194,750,998
LOB on SPED and BASE aid ³	216,550,193	223,659,091
Federal SPED funding ⁴	132,614,188	132,614,188
Medicaid SPED funding ⁴	45,312,943	45,312,943
State hospitals admin costs ⁴	300,000	300,000
Total Aid for SPED students	\$ 1,093,326,332	\$ 1,109,668,155
SPED spending ⁵	\$ 1,017,356,006	\$ 1,079,372,446
SPED aid percentage	107.5%	102.8%
SPED Excess (Shortfall)	\$ 157,358,806	\$ 116,645,505

¹Per 2023 July Comparison Report, Kansas Division of Budget
²{Wghtd. FTE w/o SPED students x BASE}/(actual Legal MAX FTE x SPED FTE)
³Legal Max LOB % times (SPED aid plus Regular aid for SPED students)
⁴FY 2021 assumed equal to FY 2022 as presented Nov. 1, 2021
⁵FY 2021 actual per CPFS, KSDE; FY 2022 estimated by KSDE

FY 2021 spending is the sum of (1) actual spending in the Special Education and Co-Op Special Education funds in the KSDE online database less payments made to Co-Ops and Interlocals, and (2) Interlocal spending provided by KSDE. It should be noted that Interlocal spending is not published by KSDE and amounted to \$236 million in FY 2021. FY 2022 spending is not yet available, so we used the KSDE estimate presented in November, 2021.

On this basis, schools received \$157 million more aid than was spent on special education in FY 2021, and \$117 million more in FY 2022.

We recommend that the formula for calculating state aid for special education be revised accordingly so that all taxpayer funding is counted.

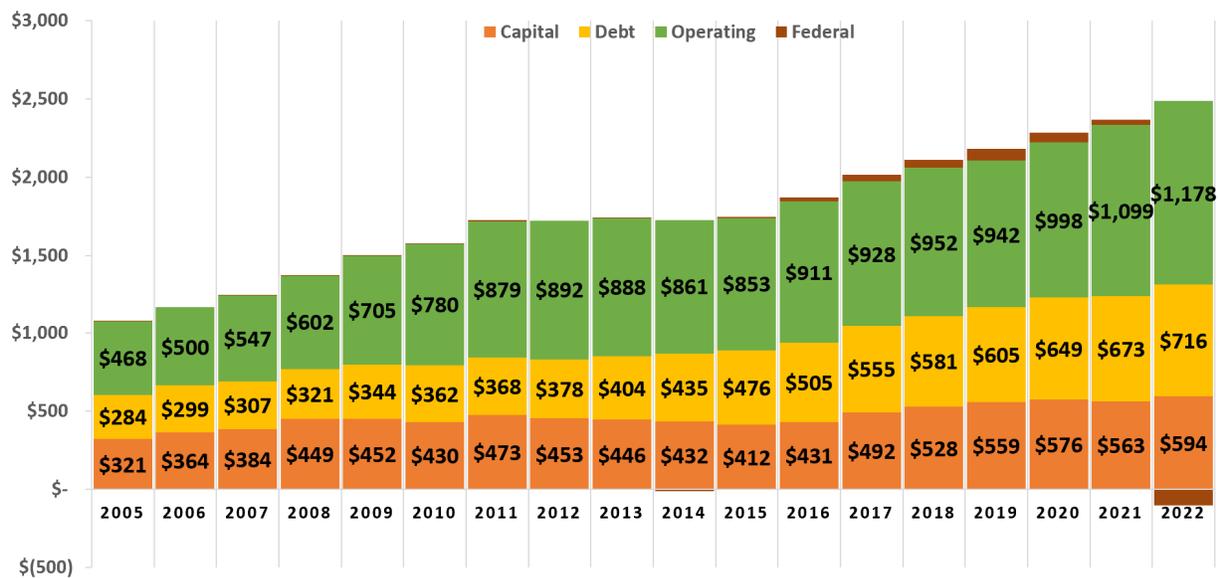

School districts added \$180 million to operating cash reserves over the last two years, including \$24 million for special education

School districts increased their operating cash reserves by \$180 million over the last two years, going from \$998 million to \$1.178 billion. Operatings reserves are total cash reserves less federal funds and those for capital outlay and debt services.

Special Education reserves, included in operating reserve totals, went from \$221 million to \$245 million over the same period.

At the very least, an increase in operating cash reserves indicates that school district operations were not negatively impacted by getting less special education aid than they believe is required. Changes in annual fund balances are like those in checking accounts; balances increase when more money is deposited than is spent.

Operating Cash Reserves as of July 1 (millions)

Cash reserves attributable to Interlocals are not included in these totals because KSDE does not publish their spending and cash reserves.

Special Education spending should be audited for proper accounting

Our review of special education spending for FY 2021 shows there is good reason for a Legislative Post Audit to ensure that other education expenditures are not charged to special education. We compiled the summary attached to this testimony from KSDE’s Comparative Performance & Fiscal System and Interlocal spending provided by KSDE.

For example, we \$1.1 million of utilities charged to special education. Other questionable charges include:

- Over \$45 million for Administration (General Administration, School Administration, and Central Services).
- The Sedwick County Interlocal charged \$5.5 million to ‘Other.’
- KSDE says payments to Special Education Co-Ops and Interlocals don’t count as expenditures because it would be double-booking when the receiving entity spends the money. However, we found \$5.6 million labeled Interagency Purchased Services that could be double-booked.
- \$51 million for Contracting of Bus Service, with most of the spending attributed to ten districts.

We propose a Post Audit review of all special education spending to determine if any expenditures should be reclassified in other funds.

Conclusion

The Kansas Association of School Boards is trying to convince parents that other education services are suffering because the Legislature isn’t funding special education according to statute. The irony of their public relations campaignⁱⁱ is that school districts consciously ignore state laws designed to improve student achievement.

For example, a 2019 Legislative Post Audit of At-Risk spending concluded “most at-risk spending was used for teachers and programs for all students and did not appear to specifically address at-risk students as required by state law.”ⁱⁱⁱ In response, then-president of the State Board of Education, Kathy Busch, published a column that essentially said, ‘shut up, go away, we know what we’re doing.’

And nothing changed.

Earlier this year, the Legislature amended the state law that requires school boards to conduct annual needs assessments in every school, after learning that school districts were generally ignoring the law. Now, the annual assessments must be published, specifying barriers to improvement, the budgetary changes needed, and the number of years needed for students to be proficient in math and reading. And once again, districts disregarded the law in varying degrees.^{iv}

Our examination of the facts indicates there is no shortfall in school funding for special education or general education. Many students may not be getting the education they deserve, but it is not for a lack of funding.

We encourage the Legislature to amend the special education formula so that all money is counted. We also recommend a Legislative Post Audit to ensure proper accounting of all special education expenditures.

Thanks again for this opportunity.

ⁱ Email exchange with Craig Neuenswander dated May 4, 2022.

72-3422. Special education state aid; computation of amounts; apportionment; limitations; special education

fund. (a) Each year, the state board of education shall determine the amount of state aid for the provision of special education and related services each school district shall receive for the ensuing school year. The amount of such state aid shall be computed by the state board as provided in this section. The state board shall:

- (1) Determine the total amount of general fund and local option budgets of all school districts;
- (2) subtract from the amount determined in subsection (a)(1) the total amount attributable to assignment of transportation weighting, bilingual weighting, career technical education weighting, special education weighting and at-risk student weighting to the enrollment of all school districts;
- (3) divide the remainder obtained in subsection (a)(2) by the total number of full-time equivalent pupils enrolled in all school districts on September 20;
- (4) determine the total full-time equivalent enrollment of exceptional children receiving special education and related services provided by all school districts;
- (5) multiply the amount of the quotient obtained in subsection (a)(3) by the full-time equivalent enrollment determined in subsection (a)(4);
- (6) determine the amount of federal funds received by all school districts for the provision of special education and related services;
- (7) determine the amount of revenue received by all school districts rendered under contracts with the state institutions for the provisions of special education and related services by the state institution;
- (8) add the amounts determined under subsections (a)(6) and (a)(7) to the amount of the product obtained under subsection (a)(5);
- (9) determine the total amount of expenditures of all school districts for the provision of special education and related services;
- (10) subtract the amount of the sum obtained under subsection (a)(8) from the amount determined under subsection (a)(9); and
- (11) multiply the remainder obtained under subsection (a)(10) by 92%.
